(Front-End Web Developer)

BASIC INFORMATION

I love creating clean, user-friendly websites that look great and work even better. Every project feels like a chance to make the web a little more accessible and enjoyable. I'm always eager to learn and grow, keeping up with the latest in technology and design to deliver the best results possible.

TECHNICAL SKILLS

HTML, CSS	**Tailwind CSS**	**Gsap**
JavaScript	**Git/Github**	**Problem-Solving Skills**
React.js	**Next.js**	**Responsive Design**

PROFESSIONAL EXPERIENCE

I recently completed a **4-month internship** as a **Frontend Developer** at **PayMe FinTech Solutions**, where I worked closely with both the frontend and backend **teams**. During this time, I contributed to the development of web applications, focusing on creating functional interfaces.

Practice Project

Employee Management App

I developed an app where the **admin** can assign tasks to **employees**, with both admins and employees having their own **login** functionality. The project was aimed at streamlining task management and improving workflow for both admins and employees.

Technologies Used : React.js, Tailwind CSS, LocalStorage.

Ochi Design Website

Interactive website for **Ochi Design** using **React**. I focused on delivering a great user experience by incorporating smooth **animations** and **transitions**. This involved building a responsive layout and integrating various React **components.**

Technologies Used : React.js, Tailwind CSS, Gsap.

Freelance

I've worked as a freelance developer, handling a range of projects from custom websites to web applications. This experience helped me hone my problem-solving skills and manage projects independently.
